Intravenous Immunoglobulin Nomination Summary Document

Results of Topic Selection Process & Next Steps

- Intravenous immunoglobulin is too broad to develop given limited program resources. No further activity will be undertaken on this topic.

Topic Description

Nominator: Individual

Nomination Summary: This nomination expresses an interest in evidence for the use of intravenous immunoglobulin (IVIG) in unlabeled indications.

Key Questions from Nominator: 1. What are the comparative levels of evidence for use of intravenous immunoglobulin (IVIG) in unlabeled indications?

Considerations

- The topic of off-label indications for IVIG is very broad because of the wide range of possible indications for this form of treatment. This topic could not be evaluated due to insufficient information given in the original nomination. Specifically, the population, comparators, and policy and/or clinical context are undefined.
