

BIOTRON INDUSTRIES LLC
U S government contractor
(Cage code 88K18 – SAMS registered)
Designers and manufacturers of the
Bio-Illuminator – The Organized-Light therapy system.

Subject: The Bio-Illuminator, using Organized-Light therapy to treat-and-correct those disorders and ailments that can occur in a normal state of health.

Light, both natural and artificial, travels in waves similar to the ocean's waves, with a high spot at the crest, and a low spot at the trough. A light's wavelength is the distance between those high, or low spots. A wavelength's force of energy is measured by its resonance, (vibration.) The light we're exposed to daily is a combination of natural and artificial light, with a mixture of many wavelengths. These assorted wavelengths of light energy produce a disorganized-clutter of light that we see as many forms of illumination and brightness.

Unlike a disorganized clutter of light, with the proper procedures wavelengths of light can be organized to produce extraordinary results. Eg. Laser beams, with adjusted wavelength forces can penetrate solid-matter, or be used to perform delicate micro surgery. U.V. light, a form of organized-light, will totally eliminate toxic bacterial, viral, and fungal pathogens, in contaminated areas.

Studies have found that our body reacts to the resonance-forces that are emitted by wavelengths of organized light. Exposure to the resonance emitted by certain wavelengths of organized light has produced some remarkable healing effects. Organized light therapy has been found to be a very effective remedy for a great number of human ailments and disorders. Organized light therapy has no side-effects, is totally non-invasive, and will restore a body's disabled functions to a normal state.

The Bio-Illuminator device coordinates the process of organizing the wavelengths of light that are to be used in light therapy treatments. A beam of white-light, (from a low-wattage incandescent bulb,) is directed through certain transparent color filters. The color filters selected will emit the wavelength forces that have been found to correct a given illness, or disorder. Organized light has successfully corrected conditions such as: Infections, from abscessed-teeth, boils, bed sores Thyroid disorders, Migraines, Sinus issues, Insomnia, Asthmatic conditions., Arthritis, Bursitis, Gout, Bone fractures, to accelerated-healing, and, many other ailments and common disorders.

The website bioilluminator.com provides photos of the Bio-Illuminator, and a description of organized-light technology. Experience the remarkably effective healing results of organized-light therapy, with the Bio-Illuminator. It's uncomplicated design allows for "out-patient" use of the device, in the comfort and privacy of one's home, or office.
